The BTS 33 Non-Electric Waterless Composting Toilet is a self-contained, biological toilet system that is designed for use where it is impractical or too costly to install a conventional toilet. The aerobic decomposition and evaporation functions of the BTS 33 reduce human waste to hygienically-safe humus that can be recycled back to nature without polluting the environment. Most common applications are cabins, cottages, work shop, basements, garages, barns, pool cabanas; anywhere you would like to have a toilet without the hassle of installing conventional plumbing.
